

DATA

Grades 6-10

Low floor, high ceiling
Conceptual focus
Historical contexts
Tell a math story
+ Coding extensions

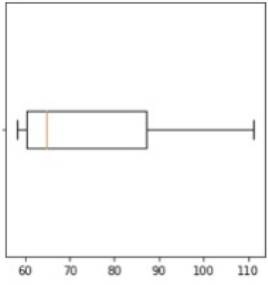

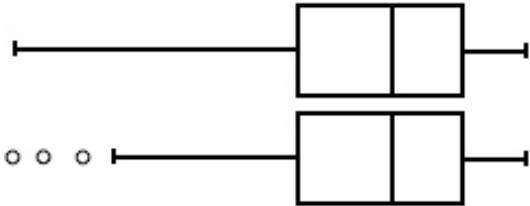

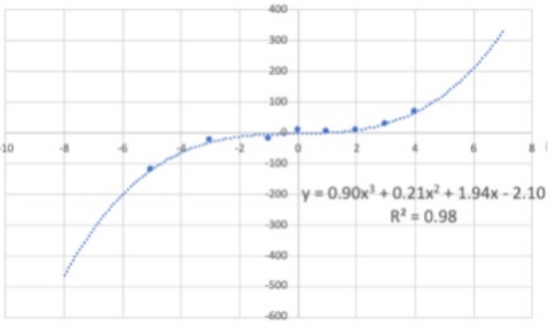

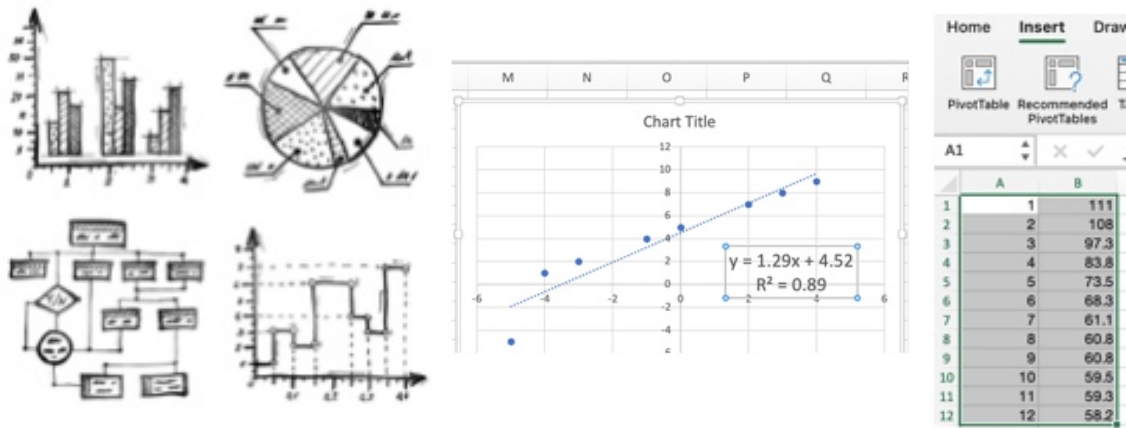

CONTENTS

DATA

4	1. DATA REPRESENTATION & ANALYSIS
4	1.1 Top 100 wealthiest people
6	1.2 Scatter plot of 12 wealthiest
8	1.3 Creating a box plot
11	1.4 History of box plots
12	1.5 Box plots with Excel
14	1.6 Box plots with Python
16	1.7 Outliers
18	1.8 Sketching box plots by hand
19	1.9 Comparing box plots
20	1.10 Interpreting box plots
22	1.11 Box plot puzzles
23	1.12 Box plot match
24	2. DATA CORRELATION
24	2.1 Random data
28	2.2 Correlated data
32	2.3 Regression analysis
33	2.4 Linear regression with Excel
39	2.5 Non-linear regression with Excel
41	2.6 Extrapolation
42	3. MATHEMATICAL MODELLING
42	3.1 Predicting marathon records
43	3.1 Predicting wealth patterns
44	3.3 Applying mathematical modelling
45	3.4 Answering a question of interest

DATA

Grades 6-10

Low floor, high ceiling
Conceptual focus
Historical contexts
Tell a math story
+ Coding extensions

CONTENTS

4 WHAT DID YOU DO IN MATH TODAY?

- 4 Talking about mathematics
- 4 Mathematics + story
- 5 Mathematics worth talking about
- 5 Content vs context
- 6 Low floor & high ceiling
- 7 Mathematics + coding
- 9 The goal of this book
- 9 Teaching with this book

10 DATA

- 10 **1. Data representation & analysis**
- 10 Trajectories, surprises & insights
- 10 Success criteria
- 11 Act 1. Connecting scatter plots & box plots
- 11 Act 2. History of box plots
- 11 Act 3. Creating box plots
- 11 Act 4. Compare & interpret box plots
- 12 Solutions
- 13 **2. Data correlation**
- 13 Trajectories, surprises & insights
- 13 Success criteria
- 13 Act 1. Linear regression
- 13 Act 2. Non-linear regression
- 14 **3. Mathematical modelling**
- 14 Trajectories, surprises & insights
- 14 Success criteria
- 14 Act 1. Modelling data & predicting
- 14 Act 2. Applying mathematical modelling
